Subject: Re: ferbam: question re tolerances on grapes and cherries

Hi Khue,
I just received confirmation from Taminco that the tolerances on grapes and cherries for ferbam will not be supported.
Regards.
Vince

Subject: ferbam: question re tolerances on grapes and cherries

Hi Vince,

I hope you are well! As you are aware, are preparing to open the registration review docket for ferbam. One question came up while EPA was looking at the labels, the tolerances, and the residue data in house. There are tolerances for ferbam on grapes and cherries in the CFR, but these uses do not appear on the label. Do you know if these tolerances are still being supported by Taminco? If so, it could affect the data that might be required for registration review.

Thanks in advance for your help!
